OUR MISSION, VISION, & VALUES

Our vision: To be recognize for our contribution to the digital economy and for value we bring to business and society.

Our mission: To enable Businesses to grow by using our effective providance of services, and people to be satisfied by finding convenience, fun and value in the products we provide.

Our values: Our values derive from "enabling our customers".At Tech Up you will find us attentive; we listen well and we engage. We are also agile; market, technology and needs are not static so we "move with your needs". We strongly believe that trust is a vital element in all relationships we build and being trust-worthy leads to confidence and cooperation.

We take you up with Technology"

WHY WORK WITH US

Business experience

The core team at Tech Up have a strong record of accomplishment in Business Management. Tech Up Managing Partners headed client services and business development within different organizations across multiple verticals. We will employ this collective hands-on experience to help your business grow and offer advise on how our clients can best achieve their goals.

Sense of purpose

Tech Up has a clear sense of purpose. Guided by our clear vision and values, we operate with a purpose, and before we do anything we repetitively ask ourselves why we are doing it, creating an environment of target setting and achievement. This will be felt in our relationships with clients as we begin with the end in mind. We believe that clarity leads to productivity, and the prime resolve will remain to help your business grow.

Proximity and trust

Our clients will witness an informal management style that promotes simple and direct relationships with a sense of immediacy. The casual and friendly environment fosters a proximity mindset where you can easily discuss and network with all Techup team no matter their position in the company. Being trustworthy is one of our core values and we believe we gain our clients' confidence by first delivering on our promise through planning and diligent execution.

ALARM SYSTEM

Most Emergencies can be averted by an early reponse. Widely known as burglar alarm system or first alert system can notify you of emergencies in a matter of seconds. In event of Forced entry, fire or a medical emergency the system can trigger off an alarm and at the same time notify you and your family on your mobile. Keeping you connected all the times. For Cost Effective Security Minus the Human Laxties!

HOME & OFFICE AUTOMATION

Smart, Safe and Simple Combine all the three qualities and you get a Home Automation system. It helps control your home to maximise your safety, comfort and convinience. The smart controls allows you to efficiently use your appliances preventing wastage. There are multiple options to control, manage and schedule your home from either inside or outside the house like checking and adjusting lights, temperature, security, audio and more,

FLEET MANAGEMENT

Anti-theft: A principal concern of new vehicle owners is that their car will be stolen. Using a GPS personal vehicle tracking software, your vehicle can be quickly located if it is stolen. Car thieves have learned that stealing cars is not as lucrative a profession to be involved in any more. They stay especially clear of cars displaying a GPS system sticker. Insurance companies look very favorably on owners that install GPS personal vehicle tracking software.

FIRE ALARM SYSTEM

is designed to alert us to an emergency so that we can take action to protect ourselves, staff and the general public.

Fire alarms are found in Offices, Factories, and public buildings, they are a part of our everyday routine but are often overlooked until there is an emergency at which point, they might just save our lives. Whatever the method of detection is, if the alarm is triggered, sounders will operate to warn people in the building that there may be a fire and to evacuate.

The fire alarm system may also incorporate a remote signal system which could then alert the fire brigade via a central station.

. Analogue Addresable fire alam panels
. Addressable Detectors
. Sounders
. Manual call point
. Interface Modules
. Digitally Addressable Fire alarm system
. Conventional detectors
. Gas suppression control panels
